

Selecting the proper watchband size for your watchbands

voguestrap[®] Watchband's convenient Sizematic[™] measuring system makes it easy to select the proper size watchband for your watch. Follow the instructions below.

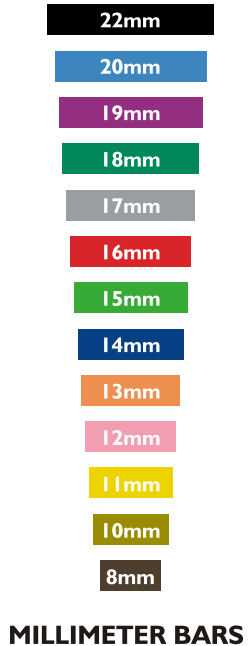

WARNING!

**IF YOU DO NOT PRINT OUT THIS PAGE
YOUR MEASUREMENTS WILL BE INCORRECT!**

Please Print the Sizematic Chart out onto paper at 100%

Sizematic[™]

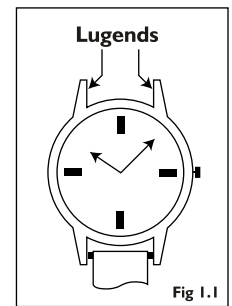

1. Measure your watch by fitting one of the Millimeter bars between the lug ends of your watch. The lug ends are the part of the watch the band attaches to. The diagram shows where they are (Fig 1.1).

2. Match the mm (millimeter) width to the width in the chart.

3. Using the size you have matched to your watch you can now match it to the watchband of your choice.

That's all there is to it!

voguestrap[®]
your watch would be lost without it.[®]
